

# rEPDM

## ❖ KIND

- Colour :N-100/200/300
- Black color:B-100/150/200/300

## ❖ rEPDM product descriptions

:EPDM SCRAP generated from WEATHERSTRIP, HOSE, DOOR GASKET, etc. of automobiles is used again as raw materials after a regeneration process.

## ❖ Advantages

### 1. Environmentally friendly

:Rubber products are cross-linked, so most of them are treated with incineration fuel or landfill, and thus the rEPDM can be reused as a raw material through a separate regeneration process, thereby preventing environmental pollution caused by waste and reducing carbon dioxide generation.

### 2. Cost reduction

:The cost reduction effect can be achieved by mixing 100% of EPDM raw materials with rEPDM in an appropriate ratio.

## ❖ Manufacturing process

:Scrap collection ▶ Sorting operation ▶ First grinding  
▶ Second grinding ▶ Mixture ▶ Desulfurization ▶ Milling ▶  
Packaging and inspection
